**Description:**

Providing a solid foundation in medical-surgical nursing, Susan deWit's **Medical-Surgical Nursing: Concepts and Practice, 3rd Edition** ensures you have the information you need to pass the

NCLEX-PN® Examination and succeed in practice. Part of the popular *LPN/LVN Threads* series, this uniquely understandable, concise text builds on the fundamentals of nursing, covering roles, settings, and health care trends; all body systems and their disorders; emergency and disaster management; and mental health nursing. With updated content, chapter objectives, and review questions, this new edition relates national LPN/LVN standards to practice with its integration of QSEN competencies, hypertension, diabetes, and hypoglycemia.

- Concept Maps in the disorders chapters help you visualize difficult material, and illustrate how a disorder's multiple symptoms, treatments, and side effects relate to each other.
  - **Get Ready for the NCLEX® Examination!** section includes **Key Points that summarize chapter objectives, additional resources for further study, review questions for the NCLEX® Examination, and critical thinking questions.**
  - **Nursing Care Plans with critical thinking questions** provide a clinical scenario and demonstrate application of the nursing process with updated NANDA-I nursing diagnoses to individual patient problems.
  - **Anatomy and physiology content** in each body system overview chapter provides basic information for understanding the body system and its disorders, and appears along with **Focused Assessment boxes highlighting the key tasks of data collection for each body system.**
  - **Assignment Considerations, discussed in Chapter 1 and highlighted in feature boxes, address situations in which the RN delegates tasks to the LPN/LVN, or the LPN/LVN assigns tasks to nurse assistants, per the individual state nurse practice act.**
  - **Gerontologic nursing** presented throughout in the context of specific disorders with **Elder Care Points boxes** that address the unique medical-surgical care issues that affect older adults.
  - **Safety Alert boxes** call out specific dangers to patients and teach you to identify and implement safe clinical care.
  - **Evidence-based Practice icons** highlight current references to research in nursing and medical practice.
  - **Patient Teaching boxes provide step-by-step instructions and guidelines for post-hospital care — and prepare you to educate patients on their health condition and recovery.**
  - **Health Promotion boxes address wellness and disease prevention strategies that you can provide in patient teaching.**
  - **NEW! Content updated with the most current health care standards,** including QSEN competencies, hypertension, diabetes, and hypoglycemia, to relate national standards to LPN/LVN practice.
  - **UPDATED! Revised chapter objectives and content** reflects higher-level critical thinking, communication, patient safety, and priority setting.
  - **UPDATED! Get Ready for the NCLEX®! review questions** updated per the 2014 NCLEX-PN® test plan.
