Description:

Review Garrison (cofounder, Iron Disorders Institute) and a team of medical advisors present a layperson's overview of a common but under-diagnosed genetic disorder of iron metabolism. Following an explanation of why hemochromatosis has frequently been overlooked, they discuss the symptoms of iron overload, diagnostic tests, genetic testing, treatment and diet. Updated from the 2001 edition, the guide includes patients' stories, checklists for physicians and patients, resources, a glossary, and bibliography.

About the Author Cheryl Garrison was instrumental in her son's diagnosis and treatment for iron overload in 1997 and is now the founding director of the Iron Disorders Institute where she

developed the institute's publications, including idInsight Magazine and the books Guide to Hemochromatosis, Guide to Anemia, and The Hemochromatosis Cookbook.
